To: Mr. Robert Fabris,

Let's start out informal. You call me Dan and I'll call you Bob. OK!

Now that that is settled. Enclosed you found my check for \$5.00 for your news letters. Please forward anything you have found out about the Arcade. I have the cassette interface but what can you tell me about obtaining the light pen. Does it connect to the cassette interface socket? Do you have a schematic of one etc.

I have personally met Dick Schultz from consumer sales and spoke with Mr. Fairchild from engineering. At this time my friend(Rick) and and my self haven't expandid the arcade. However we are in the prossess of interfacing an ASCII key board to Bally Basic (WHAT?) HA HA.

It is possible to addl16K RAM out the back. Also installing RSs Levil II and printer. We hope to do this in the near future.

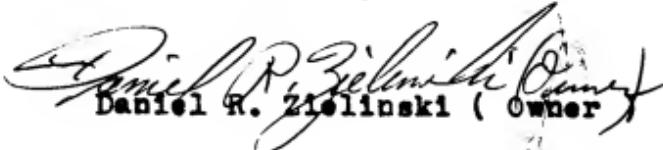

---

We have written many heavy games however because of a 1.8K memory we keep running out of memory thus messing up a damn good game.

By the way do you know where we can purchase a socket for the 50 pin connector on the rear?

OK Bob I'll hear from you soon? I hope. Let's see what we can come up with.

Sincerely

  
Daniel R. Zielinski ( Owner )
